Allowable Subject Matter

1. Claims 1-6 contain allowable subject matter over the prior art of record.
2. Claim 7 is objected to, but, it would be allowable if rewritten in the manner indicated below, in order to make it in a proper form of a method claim.
3. The following is an examiner's statement of reasons for allowance:

The claimed invention is directed to a system for recording a sequence of frames of a video. The independent claims identify the feature of "means for selecting a plurality of disjoint sets of frames from the video, there being one set of frames selected for each buffer such that a first set selects a first fraction of the frames, each subsequent set of frames being a smaller fraction than a previous set of frames, and a last set of selected frames including remaining frames; and means for sequentially storing each set of frames in a corresponding buffer". The closest prior art, Iwasaki et al is directed to a conventional data recording/reproducing apparatus having a plurality of buffer memory means, either singularly or in combination fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. This application is in condition for allowance except for the following formal matters:

It is noted that claim 7 is a method claim. However, the claim recites respectively in lines 2, and 7, the term "means" instead of --step of--. Correction is required.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
